‘Deadly Drones’: Israeli Expert Explains What Makes Iranian Shahed-136 UAVs So Successful Against West-Backed Ukraine

Uzi Rubin, Israeli defense engineer, analyst, and Research Fellow with JISS, told EurAsian Times – “The advantage comes from the design of the Shahed-136 suicide UAVs.”

Ukraine Set To Turn Tables On Russia With A Drone ‘More Destructive’ Than Shahed-136 Kamikaze UAVs

Ukraine is developing its long-range kamikaze drone to counter the Russian Geran-2 (Shahed-136), which is wreaking havoc in Ukraine by effortlessly and rather economically destroying Ukraine’s power generation capability. The Ukrainian drone is claimed to have a heavier warhead.
