Could ChatGPT and other AI Chatbots replace human jobs

Chat GPT is the world's most powerful AI chatbot. It offers a human-like alternative to search engines and can do everything from compile a menu to writing a TV script ...

Wird die KI GPT-4 von OpenAI eine AGI sein?

GPT-4 ist das nächste große Sprachmodell von OpenAI nach GPT-3 und ChatGPT. Es soll 100 Billionen Parameter verwenden und multimodale Eingaben wie Audio, Text und Video akzeptieren.

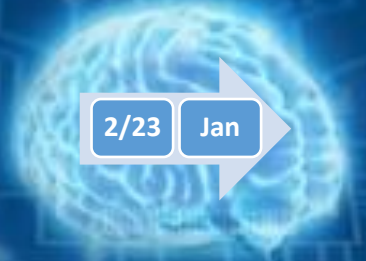

AbramsX Tank: The Most POWERFUL AI-ENABLED Weapon of the FUTURE

The tank has been equipped with an artificial intelligence system that can control the turret and fire the main gun. The Abrams X is considered to be the most Advanced Main Battle Tank ever produced!

MUST READ! - AI-Special

Demystifying the five 'sights' of artificial intelligence

The goal is not to replace human intelligence, it's to augment and amplify human decisions.

Artificial Intelligence as a tech category has become so broad that it's nearly lost all meaning. It encompasses everything from chatbots to autonomous vehicles to scenes from Terminator 2...

Information superiority and the race for global AI leadership

Thanks to advances in AI, human-agent teaming and machine learning, soldiers will provide commanders with real-time information about the enemy gathered from a variety of different sources, including possible courses of action, which will help them to make better decisions in battle.
