Counter-drone tech need like that of 155mm shells

“It’s not the industrial base’s fault,” Pentagon said, of the limited capacity for drones and drone defenses. “The market has not demanded of them because we’ve not demanded it.”

Best Look At A VAMPIRE Counter Drone System For Ukraine

This is the first time we have seen the actual configuration of VAMPIRE, which was rushed to Ukraine to swat drones out of the sky.

Roadrunner Reusable Anti-Air Interceptor Breaks Cover

Roadrunner can takeoff from its ‘nest’ vertically, loiter until a drone or missile threat pops up, and destroy it, or return and land if not.

U.S. Army Moves To Mobilize And Disperse Its Increasingly Vulnerable Command Posts

U.S. Army planners have learned an important lesson from observing Russian tactics in recent wars: if you want to avoid becoming a casualty, you better not stay in the same place for long. The Russians will find you and take you out.

The Russians Couldn't Take Avdiivka With Tanks. They Couldn't Take It With Infantry. Now They're Trying With Drones.

A new type of night-flying attack drone could close Ukrainian supply lines into Avdiivka. The city's garrison might have to retreat, even after holding out for months against tank and infantry assaults. But if the Ukrainians can shut them down with electronic jamming—then Avdiivka might hold.
