Ukraine setzt jetzt voll auf Kamikaze-Drohnen

Angesichts stockender Artillerie-Granaten-Lieferungen aus dem Westen hat die Ukraine ihre Produktion nun voll auf FPV-Kamikaze-Drohnen umgestellt

Tank Active Protection Systems Could Be Used To Shoot Down Drones

Active protection systems already installed on heavy armored vehicles to swat down missiles and rockets could possibly do the same for drones.

Ukraine's Drone Boats Are Now Firing Rockets At Russian Ships

While the practicality of attacking ships with this capability is questionable, it's part of Ukraine's effort to evolve its drone boat force.

MUST READ! – UKRAINE Special

Russia May Have Started Using Jet-Powered Shahed Drones In Ukraine

Iranian-designed, jet-powered Shahed-238 drones used by Russia would be much faster and harder to shoot down than the prop-powered Shahed-136.

Ukraine's Jet Powered UJ-25 Skyline Drone Appears On Battlefield

The UJ-25 can get to its targets faster and can be harder for Russian to defend against compared to its propeller-driven counterparts.
