Pulsejet Drone Flies, Could Have Big Impact On Cost Of Future Weapons

The pulsejet-powered Scitor-D reflects growing interest in low-cost, high-performance engines for decoys, one-way attack drones, and more.

Meduza X: Drohnenabwehrsystem für infanteristische Einheiten

Meduza X erkennt, klassifiziert und verfolgt Drohnen dank einer Kombination aus Wärmebildgerät, eines elektrooptischen Systems und effizienter Algorithmen.

Army units must trim command posts, add drones to survive

Fighting in Ukraine and Gaza has taught Army leaders that units must shrink their battlefield headquarters to survive, and work drone and counter drone tactics at every level.

MUST READ! – UKRAINE Special

Automated Terminal Attack Capability Appears To Be Making Its Way Into Ukraine's FPV Drones

A video posted recently to social media purports to show a Ukrainian first-person view (FPV) drone engaging a Russian tank without the operator being in the loop during the last moments of its flight.

Ukrainian FPV Drones Hunt, Kill Russian Armor Inside Building

This footage shows Ukrainian FPV drone operators hunting for Russian armor inside a warehouse, exactly the kind of structure that one would think would conceal and thus protect assets from such attacks.
