Ukraine pulls US tanks from front lines over Russian drone threats

Ukraine has sidelined U.S.-provided Abrams M1A1 battle tanks for now in its fight against Russia, in part because Russian drone warfare has made it too difficult for them to operate without detection or coming under attack

This Is The Army's New M2A4E1 Bradley That Features Iron Fist Protection

Hard-kill active protection systems offer valuable additional defense against missiles and rockets, and could be used to swat down drones.
