

## TRENDS!

### Rogue 1 Is One Of The Marine Corps' Newest Kamikaze Drone

Rogue 1 is being procured alongside two other types that are competing to give the USMC more robust man-portable loitering munitions.

### Every Marine A Drone Defender Under Three Part Counter-UAS Plan

The USMC is tackling the huge threat posed by unmanned aerial systems in a holistic fashion, where every Marine could play a role.

### 'Robot Marines' In Every Formation: Corps' Robotics Chief Casts Vision

Intelligent Robotics and Autonomous Systems chief for the USMC lays out just how critical robotics will be in a future fight. (have a look at Trend-Flyer 11/23)

## **MUST READ! – UKRAINE Special**

### Ukraine May Now Be Using WWI-Style Air Combat Tactics Against Drones

Recently published videos appear to show Ukraine using a propeller-driven Soviet-era Yak-52 training aircraft to attack a Russian Orlan-10 drone, reportedly in the Odesa region of southwest Ukraine.

### Ukraine's soldiers use cheap tech to hide from Russia's deadly drones

On Ukraine's frontlines, how fast you can spot a buzzing enemy quadcopter can determine whether you survive an imminent artillery barrage or an attack by the drone itself. That's driven intense demand for low-budget drone detectors ...
